SKILLS

Data Science Tools: Python, R, PostgreSQL, MongoDB, Docker, Pytorch, Git, Tableau, Dash, Shiny, Quarto

Statistical Modeling: A/B Testing, Causal Inference, Bayesian Modeling

Experience: Program & Project Management, Quality Management System (QMS) Change Control, MES, SAP

EDUCATION

[Master of Data Science](#) | The University of British Columbia

Completion June 2025

Relevant Courses: Deep Learning, Supervised Learning, Collaborative Software Development, Time Series

Bachelor of Applied Science, Chemical and Biological Engineering | The University of British Columbia

May 2021

PROFESSIONAL EXPERIENCE

STEMCELL Technologies

Vancouver, BC

Senior Program Associate, Custom Products

Jan 2024 - June 2024

- Streamlined the launch of 5-10 custom media and cell separation products weekly to meet growing customer demand, ensuring seamless end-to-end operationalization from feasibility to manufacturing and quality release.
- Designed an internal app for custom product requests to centralize data management, improving stakeholder visibility and reducing request processing time from 8 to 2 business days.
- Developed and maintained a Tableau business intelligence report to analyze and track custom product trends, enabling data-driven decision-making for leadership.

Senior Program Associate, Operations Management

Aug 2023 - Jan 2024

- Led Incident Command operations to resolve business emergencies, such as supply chain disruptions and product failure investigations, within 2-4 weeks of occurrence, using a structured response framework.
- Led Batch Size Change, Product Spotlight, and Margin Improvement programs, increasing production efficiency and enhancing product profitability.

Manufacturing Operations Coordinator

May 2021 - Aug 2023

- Launched a corporate Change Program to standardize the intake of Change Control Requests (CCRs), reducing review times and increasing process consistency across departments, and acted as interim Change Coordinator for 12+ months.
- Managed 90+ Manufacturing CCRs daily, ensuring timely completion in alignment with corporate goals with 100% success rate.
- Reduced CCR Backlog backlog by 10% within 6 months through targeted process improvements.
- Led Manufacturing Execution System (MES) implementation for knowledge transfer from 500+ paper batch records into SAP, improving data accuracy and accessibility.

PROJECTS

[Pharmaceutical Spending Dashboard](#) | Dash

- Built an interactive dashboard with Dash for visualizing pharmaceutical drug spending across the world.

[Python package: salesanalyzer](#) | PyPI, pytest, ci-cd

- Co-authored a Python package to help small businesses analyze sales data efficiently, implementing automated testing and continuous integration for reliable performance.

[NYC Airbnb Popularity Prediction](#) | Regression, Feature Engineering, SHAP, Quarto, Makefile

- Built an end-to-end data science pipeline for predicting Airbnb's listing popularity with multiple regression models (Ridge, LightGBM, RandomForest), incorporating explainability with SHAP.

[Wine Chromatic Profile Predictor](#) | Docker, Logistic Regression, Quarto Report

- Built a reproducible ETL pipeline for wine color classification, using Docker and Makefile.

[GoodReads Insights](#) | Shiny, Google Books API

- Designed a personalized reading analytics dashboard by integrating Google Books API with GoodReads data, providing users with actionable reading insights through a Shiny app.

LEADERSHIP & ACTIVITIES

Career & Professional Development Representative

Jan 2025 - Present

- Launched the internal networking program "MDS-connect" to foster community building within the Master of Data Science (MDS) Program.
- Organized technical interview clinics by curating Leetcode and StrataScratch questions, and offering hands-on practice.

Mentor, Datathon by Women in Data Science UBC

March 2025

- Provided mentorship and guidance to participants of a weekend-long datathon, assisting with problem-solving, data analysis techniques, and effective storytelling using data.
