SKILLS

Data Science Tools: Python, R, PostgreSQL, MongoDB, Docker, Pytorch, Git, Tableau

Experience: Program & Project Management, Quality Management System (QMS) Change Control, SAP

Languages: Spanish (conversational), Russian (proficient)

EDUCATION

Master of Data Science

Completion June 2025

The University of British Columbia | Vancouver, BC

Relevant Courses: Deep Learning, Supervised Learning, Collaborative Software Development, Time Series

Bachelor of Applied Science, Chemical and Biological Engineering

May 2021

The University of British Columbia | Vancouver, BC

PROFESSIONAL EXPERIENCE

STEMCELL Technologies

Vancouver, BC

Senior Program Associate, Custom Products

Jan 2024 - Jun 2024

- Project managed the end to end operationalization of custom media and cell separation products (5-10 a week), from feasibility assessment, knowledge and data transfer into SAP, manufacturing and quality release.
- Designed an internal app for custom product requests, centralizing data management, and improving stakeholder visibility and process efficiency.
- Developed and maintained a Tableau business intelligence report to analyze and track custom product dynamics.

Senior Program Associate, Operations Management

Aug 2023 - Jan 2024

- Led high-stakes Incident Command operations using a structured response framework, successfully resolving critical business emergencies, such as supply chain disruptions and product failure investigations.
- Led Batch Size Change, Product Spotlight, and Margin Improvement programs, optimizing production efficiency and enhancing product profitability.
- Drove cross-functional collaboration between supply chain, manufacturing, and quality teams to implement scalable operational improvements by accelerating decision making process and reducing turnaround.

Manufacturing Operations Coordinator

May 2021 - Aug 2023

- Managed 90+ QMS change control requests (CCRs) daily, ensuring timely completion of changes in alignment with project deadlines and corporate goals with 100% success rate.
- Reduced CCR Backlog backlog by 10% within 6 months through targeted process improvements.
- Led Manufacturing Execution System (MES) implementation to transition 500+ paper batch records into SAP, improving data accuracy and accessibility.
- Played a key role in launching the corporate Change Program for centralized CCR intake, driving consistency and efficiency in change management processes, and acted as interim Change Coordinator for 12+ months in addition to ongoing responsibilities.

PROJECTS

Python package: salesanalyzer ([GitHub](#)) | *Tools: PyPI, pytest, ci-cd*

- Co-authored a python package to assist small businesses with sales data analysis
- Implemented automated testing and continuous integration

NYC Airbnb Popularity Prediction ([GitHub](#)) | *Tools: regression, feature engineering, SHAP, Quarto, Makefile*

- Built an end-to-end data science pipeline for predicting Airbnb's listing popularity with multiple regression models (Ridge, LightGBM, RandomForest), incorporating explainability with SHAP.

GoodReads Insights ([GitHub](#)) | *Tools: Google Books API, Seaborn*

- Integrated Google Books API with GoodReads personal data export to analyze reading patterns and generate visual insights.

ADDITIONAL

Interests: Community building, reading (science non-fiction, contemporary fiction), volleyball, skiing, ballet.
